VDSL2 PTM Bonded | 4 Ethernet Ports | 1 Gig FlexPort | USB Host | 802.11n

NexusLink 3101/3100u Bonded Router

The NexusLink 3101/3100u Multi DSL Bonded Router is a single box solution for triple play applications. It features dual VDSL2 bonded ports that provide twice the VDSL bandwidth (12a/12b profile) over comparable single-port models. With PTM mode supported, it can provide better performance than a regular ATM mode router. The NexusLink 3101 is equipped with four Fast Ethernet ports. The NexusLink 3100u is equipped with four Fast Ethernet ports, one Gigabit FlexPort and an 802.11n (draft) WLAN Access Point (AP). It goes above and beyond with high level features such as QoS, VPN and remote management (with TR-069 support).

FEATURES

Bonded VDSL2 and Wired/Wireless LAN

The NexusLink 3100u features VDSL2 (12a/12b) with auto-switching based on DSLAM settings. An integrated 802.11n WLAN Access Point (AP) operates at speeds of up to 300 Mbps without sacrificing backward compatibility with 802.11b/g. The TR-068 compliant rear panel and LED indicators also simplify installation and improve ease-of-use. Additionally, the USB host port connects to printers. (Wireless LAN is only available for NexusLink 3100u)

Quality of Service

Classify, control, and prioritize diverse traffic types, for pristine video, toll-quality voice, and error-free data transmissions.

Safe & Secure Connections

As the first level of protection, a Stateful Firewall (with DoS protection) and NAT/PAT help to isolate the LAN from external threats. IP and MAC address filtering provide fine-grained access control to or from the network. Advanced security technologies, such as Virtual Private Networks (VPN) with PPTP pass-through, L2TP pass-through and IPSec pass-through ensure secure networking, and WPA/WPA2/802.1x/WEP guarantee rock-solid security for wireless connections.

Remote Management

TR-069/TR-098/TR-111 standards compatibility ensures interoperability with central office remote management equipment. From the user perspective this reduces downtime and frustration. For the service provider it means improved customer relations and simplified management. Other management options include telnet, ssh and a web user interface with advanced command and control functionality.
